

Query 1

The text discusses various political initiatives and decisions in Switzerland, including a proposed constitutional amendment for direct election of the Federal Council, increased funding for nuclear reactor development, and changes to military training and weapons use. It also covers discussions on immigration policies, agricultural trade agreements, and health concerns like [...]

The Göttingen research advises on protecting against atomic bomb effects. Key measures include sturdy bunkers and quick reactions. Radiation dangers are outlined, emphasizing shelter and minimizing exposure.

The text discusses radioactive waste storage in Finland and Switzerland. It emphasizes community involvement and safety measures. Nuclear power provides over one-third of electricity, with current safe intermediate storage. Future secure deep geological repositories are crucial for sustainability.

Socialism in Switzerland has two faces. As rulers, they support banking secrecy but oppose it when governed. This contrasts with Austria, where a socialist government strengthened banking secrecy. Swiss socialists seek opposition roles while retaining governmental privileges, raising doubts about their ability to ignore reality indefinitely.

BKW seeks younger Elektromechaniker/Elektromonteur as control specialist for Mühleberg nuclear power plant. Requires knowledge in control and telecommunication systems, electronics, and industrial plant experience. Training provided. Apply with usual documents to Bernischen Kraftwerke AG, Mühleberg, 3203 Mühleberg. Contact 031 751 09 91 ext. Aeschbach.

Query 2

In a democratic context, no case is trivial regarding fundamental principles. A Geneva court contested an anti-nuclear activist's fine for posting unauthorized posters. The activist argued free spaces were costly or overtaken by commercial flyers. Lawyers debated freedom of expression vs. public order laws. The court deferred judgment until February [...]

The world reacts to a Soviet 50-megaton bomb test. Newspapers worldwide criticize the test, calling for unity against nuclear arms. Canada's Diefenbaker condemns the act. Protests occur in London and Switzerland against nuclear tests. Syndicates express deep concern over the threat.

The Sahara nuclear test boosted France's atomic status but met global concern. Any major power can develop nuclear weapons. This increases world anxiety. Truman used the atomic bomb on Japan to avoid millions of casualties. Post-war, international control was proposed but rejected by the USSR, leading to nuclear proliferation risks.

The National Council's Commission on nuclear energy revised the Atomic Law, requiring long-term safe waste disposal for framework approval. The Commission, chaired by Reiniger, met in Bern and will discuss the nuclear initiative in March. Waste disposal solutions are crucial before the law reaches the Federal Council in April.

Moscow announces plans to resume nuclear tests, citing international pressure. The Soviet government emphasizes its actions aim to prevent a third world war. U.S. responds by recalling delegate from Geneva talks.

In a democratic context, no case is trivial regarding fundamental principles. A Geneva court contested an anti-nuclear activist's fine for posting unauthorized posters. The activist argued free spaces were costly or overtaken by commercial flyers. Lawyers debated freedom of expression vs. public order laws. The court deferred judgment until February [...]

Query 3

The text discusses Iraq's chemical weapons capabilities, emphasizing their strategic and psychological impacts. Despite limited resources, Iraq possesses potent chemicals like mustard gas, nerve agents, and binary weapons. They threaten to use missiles for delivery, though with questionable reliability. Chemical weapons serve more defensively, posing psychological threats rather than direct [...]

The exhibition "Visions du Futur" at the Grand Palais explores human hopes and fears about the future, from ancient times to modern day, emphasizing dreams of utopia and the search for paradise across civilizations.

The U.S. aims to increase military aid to about \$7.5 billion. Lovett warns against overestimating atomic weapons' impact. De Gasperi discusses Italy's role in Europe and population issues with Truman. Popovic suggests direct talks on Trieste with Italy.

The text discusses strategic arms negotiations between the US and USSR, focusing on SALT talks aimed at reducing nuclear arms competition. Despite efforts, progress has been limited, allowing the USSR to increase its ICBM arsenal. This could lead to a nuclear superiority by the mid-70s, affecting European stability.

In a democratic context, no case is trivial regarding fundamental principles. A Geneva court contested an anti-nuclear activist's fine for posting unauthorized posters. The activist argued free spaces were costly or overtaken by commercial flyers. Lawyers debated freedom of expression vs. public order laws. The court deferred judgment until February [...]

Query 4

The 1973 annual meeting of German Catholic journalists focused on ethical journalism, press freedom, and media policy. Discussions included the proposed journalistic code of ethics but did not seriously pursue its formulation. Participants emphasized the need for practical application of press council principles.

The Visions du Réel festival celebrates 40 years and 15 years of reformation. It showcases diverse documentary forms, from experimental cinema to narrative works. Despite TV's mass production, the festival focuses on independent creation. Key sections include investigative films addressing urgent issues and essays exploring themes through various perspectives.

Zoustänn, a new magazine by youths, sells for 35 francs. Unlike previous papers supporting parties or addressing specific political scenes, it offers free expression to all, regardless of beliefs or age. Issue one covers love, atom power, dyslexia, music, city bistros, films, book reviews, poetry, comics, and cartoons. While praised, [...]

The Luzern FilmkritikerSeminar explored taboo topics in cinema. It brought together film critics and religious film commission members from Germany, Austria, and Switzerland. Modern media challenge traditional norms, affecting various aspects of life. Taboos serve both protective and power-serving functions. The seminar aimed to discuss how to address taboos without [...]

Over 350,000 pacifists participated in German reunification celebrations and anti-nuclear protests in West Germany and Britain. Despite adverse weather and declining mobilization, about 11,000 attended a protest against a new missile base near Molesworth, UK.

Query 5
