

Query 1

The Ständerat discusses financial matters, including coupon and Wehrsteuer taxes. The Council decides to uphold previous decisions and reject changes proposed by various members. Differences arise regarding tax variability and specific amounts for unmarried and married individuals. The Council also debates and finalizes tax rates for corporations and refunds. Additionally, [...]

A radioactive package was left on an IC train seat in Lausanne. Found, do not open; contact local police. Toning birthday telegrams cost CHF 8 more and have increased usage. Rega performed 15 rescues/day in 1982, saving 4747 people, with 189 too late.

The text discusses pacifism and environmentalism in divided Germany, highlighting figures like Roland Jahn and Udo Lindenberg. It explores how activists from both East and West Germany oppose nuclear weapons and seek common ground through movements like anti-nuclear protests and church gatherings. Despite cultural shifts, national identity remains complex and [...]

The text provides information about language certifications (Cambridge, Goethe, Alliance Française) and an environmental campaign encouraging Swiss voters to support three solar energy initiatives on September 24th.

The text discusses nursing roles, the risks of nuclear energy, and a translation error in an advertisement for Freiburg's tourism. It emphasizes the importance of accurate translations and promoting Freiburg's heritage and landscapes.

The text discusses pacifism and environmentalism in divided Germany, highlighting figures like Roland Jahn and Udo Lindenberg. It explores how activists from both East and West Germany oppose nuclear weapons and seek common ground through movements like anti-nuclear protests and church gatherings. Despite cultural shifts, national identity remains complex and [...]

The text discusses growing pacifist movements in Europe and America, with concerns about communist influence and Soviet manipulation. It highlights widespread fear among Western populations due to nuclear war risks, emphasizing that this is not a political issue but a reflection of deep anxiety.

The Basque region's nuclear power plant project faces severe threats from ETA. Since 1977, ETA's attacks have halted construction, endangering investments and threatening regional energy supply. Public hostility to ETA has grown, and the government struggles to protect infrastructure.

The text discusses nuclear fusion projects worldwide, focusing on two main confinement methods: inertial and magnetic. Tokamak technology, developed in the USSR, appears promising for controlled fusion. The European collaboration aims to launch JET in 1983. Future steps include building a global fusion machine and addressing material resistance, tritium confinement, [...]

On July 28, 1984, PEOS aimed to spread objective facts about nuclear energy.

The Swiss Road Federation opposes Buhler's motion, urging the government to reject it. The motion proposes funding national road construction solely with fuel taxes, reducing financial support. This could severely impact the country. The National Council's Foreign Affairs Committee discussed foreign policy, a Council of Europe meeting, and treaties with [...]

The text discusses a referendum in Switzerland, focusing on ecumenical positions. Leaders showed courage by opposing exceptions, reflecting a widespread apathy towards religious disputes. The vote highlighted both ecumenical and divisive religious attitudes.

The SAD (Swiss Political Early Warning System) promotes neutral, democratic discussion on Switzerland's future. It publishes books and documents addressing political challenges. Recent initiatives include coordinating boat shows in Geneva and Zurich, and planning a new international fair for leisure activities in Geneva.

Adolf Ogi must decide on closing Mühleberg nuclear plant. Opponents present evidence showing reduced electricity consumption by 10%. They campaign against unlimited operation and capacity increase. Citizens voted against it in 1992, but the decision lies with the Federal Council, expected by year-end.

The document discusses various administrative and economic matters, including budget approvals, personnel changes, and economic developments. It mentions the Swiss Federal Council's approval of reports and financial statements, appointments of new officials, and adjustments to telecommunication regulations. Economic challenges and infrastructure improvements are highlighted, along with international relations and security [...]

In October, we honor the past to shape the future. The centenary congress aims to democratize work, involve workers, and protect social institutions. Equality, environmental action, and state intervention are key.

Guido Ceronetti's "Le Silence du Corps" challenges rationalism by exploring the sacred in bodily mysteries, rejecting reason's simplifications and avilishments. His vast cultural knowledge spans ancient and modern languages, mythologies, and medical texts.

The Basque region's nuclear power plant project faces severe threats from ETA. Since 1977, ETA's attacks have halted construction, endangering investments and threatening regional energy supply. Public hostility to ETA has grown, and the government struggles to protect infrastructure.

French naval commandos seized Greenpeace's Rainbow Warrior II near Mururoa Atoll, cutting communications. This occurred days before France resumed suspended nuclear tests. The incident led to Fernando Pereira's death in 1985. Commemorative events and silent protests are planned.

Protestors at Fusterie center in Geneva, Argentina, demand full list of missing, held captive. They protest a 90-day legal deadline for sightings, calling it genocide legalization. They seek UNHCR and minority protection subcommittee intervention. Protest continues until Saturday.

The revised nuclear law referendum will be submitted to the Federal Chancellery by Monday morning, the deadline. The committee collected over 80,000 signatures, surpassing the required 50,000. After review, the Chancellery will announce if the referendum is valid. This follows the February 18, 1979 initiative aimed at new nuclear plant [...]

In 1979, after a four-year struggle, Kaiseraugst's community approved building permits for the controversial nuclear reactor, ending local opposition. Similar developments occurred at Leibstadt, enabling Switzerland's first large-scale nuclear power plants to commence operations. Specific conditions, agreed upon by opponents and accepted by the study consortium, ensure environmental monitoring and [...]

The EU strictly controls toxic waste transport post-Seveso directive. Adopted in 1982, it aims to prevent uncontrolled movement within the EEC, effective Oct. 1985. Producers and carriers must notify authorities before transporting. Nuclear waste is excluded. This ensures safer handling and recycling in best-equipped facilities.

The call is directed against Cattenom. European elections on June 10 must solve this transregional issue swiftly. Parties are urged to cooperate to prevent the Cattenom project. If unsuccessful, the elections' purpose may be questioned. A growth-focused regime might not abandon nuclear energy without strong public support.

Swiss express frustration with nuclear power. Amid federal decision, 20,000 protesters demonstrated in Argovia.
